1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, are drawn to a **square root calculator / method of calculating square root**, classified in class 708, subclass 605.
- II. Claims 11-16, are drawn to a **disc drive having a data disc**, classified in class 360, subclass 240+.

2. The inventions are distinct, each from the other because:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because subcombination is not essential to combination, i.e., independent claim 11 [of Group II] does NOT recite the detail of a square root calculator as recited in independent claim 1 [of Group I]. The subcombination has separate utility such as a square root calculating device.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2124

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
